Industrial Product  
Cisne Aqua**

# Cisne Aqua

## Characteristics

Salt tablets produced with high purity sodium chloride. The quality of the product combined with the homogeneous shape of the tablets makes Cisne Aqua the best alternative for water treatment in resin regeneration processes and chlorine generation for electrolysis.

## Technical Specification

Description	Unit.	Specification
Sodium chloride	%	Min. 99,30
Calcium	%	Max. 0,030
Magnesium	%	Max. 0,100
Sulfates	%	Max. 0,220

## Applications and presentation

- Water treatment processes in the regeneration of cationic resins
- Generation of chlorine by electrolysis.

Product	Standard Packaging	Palletization
Cisne Aqua	25kg Bags	49x25kg= 1,225kg

## Benefits

- Reduces the frequency of maintenance of the equipment
- Extends the useful life of resins
- Promotes efficient ion exchange
- Promotes water and salt savings in processes
- Improves chlorine generation yield
- Suitable for use in industrial softeners
